

Caregivers needed for Fetal Alcohol Spectrum Disorder (FASD) research.

Do you have a child within the ages of 3 to 12 years old and diagnosed with FASD or known prenatal alcohol exposure? You may qualify for this study.

University of Rochester's researchers are developing a new app for families raising children with FASD. This app will provide resources, tools and information on how help your child's behavior.

Participate in the study and receive access to the app and monetary compensation. You must have access to an IOS (iPhone or iPad) device.
